GUIDE TO THE CODEBOOK DOCUMENT

Variable Guidance

The information in this section with help map the variables to the respective questions found in the instrument files.

The first two variables are identifiers (id_2 and status) variables 3 (numadlts) through 44 (income) pertain to the instrument Parentq_YISS2, variables 52 (websites) through 524 (bullyvic) pertain to the instrument Youthq_YISS2 and variables 45 to 51 (rule1 to rule3) and 525 through 610 (yiss to exposure_2) are summary and derived variables. Information on instrument section and respondent for each variable can be found in the codebook. The variable name in the data file and instrument file may not be identical, but through the order of variables and the names and labels given one may readily discern which variable or variables match an instrument question.

The read-in response and skip-logic for survey questions can be found in the instrument documents: Parentq_YISS2 and Youthq_YISS2.   Other information can be ascertained from the instruments as well, for instance whether possible response choices were offered or whether voluntary responses were coded into categories.

Variables finc and finc_2 identify the incidents used for follow-up questions. See page 12 of the YISS Youth Interview (Youthq_YISS2) for an explanation of how USES items for follow-up were chosen.

Variable pri1 identifies the read-in item for follow-up in the online relationship section. See page 37 of the YISS Youth Interview (Youthq_YISS2.pdf) for definitions.

Variables Rule1 to Rule3 are not included in the instrument file. The Codebook provides text to describe the survey questions and coded responses.

Variables described as "mention 1", "mention 2", and so on are recorded in the actual order of the response.

A negative value for the variable agediff indicates that that the youth respondent was older than the person with whom they were talking.

Some value labels may be truncated by software. Use the instrument files to obtain the full label.
